Digital thermometer, an internal sensor and an external sensor (indoor / outdoor meter). The RT-801 is very suitable for the measurement of temperatures in, for example, refrigerators and freezers.

FEATURES

- ✓ Display in ° C or ° F
- ✓ Min / Max function
- ✓ Adjustable alarm
- ✓ Backlit screen
- ✓ Waterproof external sensor
- ✓ High Accuracy
- ✓ Low battery indicator

CALIBRATION CERTIFICATE

We can supply this thermometer with a calibration certificate (only the external probe). The thermometer will be tested on 4 temperatures and the test results will be mentioned on the certificate. All our certificates are according due to international standards.

SPECIFICATIONS	
MEASURING RANGE	-10°C to +50°C (internal sensor) -50°C to +70°C (external probe, adjustable alarm)
OPERATING TEMPERATURE	0°C to +50°C
ACCURACY	± 0,5°C (-20°C to +50°C), others 1°C
RESOLUTION	0,1°C
DIMENSIONS PROBE	Diameter 5 mm, length 30 mm
CABLE LENGTH	3 meter
DIMENSIONS DISPLAY	48 (L) x 21 (B) mm
DIMENSIONS PRODUCT	73 (L) x 52 (B) x 18 (H) mm
WEIGHT	65 g
BATTERY	1 x 3V CR2032 Button cell
INCLUDING	Battery and manual
OPTIONS	calibration Certificate
